Teaching Excellence Framework: Year two

Statement of findings

East Riding College

UKPRN: 10002126

TEF Bronze

This award was made in June 2017 and is valid for up to three years.

The TEF Panel reviewed the provider metrics and provider submission according to the process and criteria specified in the TEF guidance.

The provider metrics, supplemented by the submission, indicate that most students achieve good outcomes, with the provider being notably above benchmark for progression to employment or further study for the minority mode of full-time students. The panel noted the limited statistical significance of the provider's metrics and regarded the evidence in the submission as particularly important in reaching an overall judgement.

The Panel considered all the information in the provider submission in relation to the TEF criteria and its judgement reflects, in particular, evidence of:

- appropriate programmes of study designed to meet individual and local growth demands and to facilitate student progression to employment or further study
- course design that offers employment-related assessment, ensuring that most students acquire knowledge, skills and understanding that are valued by employers
- programme delivery that is structured to enable good engagement in personalised provision, with a range of support mechanisms including the use of mentors, disability advisers, and the introduction of Success Centres for study skills development
- a learning environment that responds to student needs and feedback and which has been enhanced by investment in the physical and digital resources that are used by students
- good support for staff development and the sharing of good practice, including the consistent use of peer observation, conferences, and the introduction of a Research and Scholarly Activity journal.

Overall, the TEF Panel judged that the combination of evidence in the provider metrics and the provider submission best fits the descriptor for a Bronze award.
