Teaching Excellence Framework: Year two

Statement of findings

Roehampton University

UKPRN: 10007776

TEF Bronze

This award was made in June 2017 and is valid for up to three years.

The TEF Panel reviewed the provider metrics and provider submission according to the process and criteria specified in the TEF guidance.

The provider metrics, supplemented by the submission, indicate that most students achieve good outcomes, with high levels of progression to employment or further study. There are high levels of student satisfaction with teaching although student satisfaction with academic support, and retention of students, are below the University's benchmarks.

The Panel considered all the information in the University's submission in relation to the TEF criteria and its judgement reflects in particular, evidence of:

- employers who are involved in curriculum review and ensure programmes are contemporary and reflect employer needs and graduate attributes
- course design and assessment practices providing stretch that ensures that most students acquire knowledge, skills, and understanding that are valued by employers
- a commitment to student engagement through a strong and embedded partnership
- an institutional strategy that informs investment in high quality physical and digital resources, including investment in teaching spaces and a new library, used by students to further their learning
- an institutional culture of valuing, recognising and rewarding teaching.

Overall, the TEF Panel judged that the combination of evidence in the provider metrics and the provider submission best fits the descriptor for a Bronze award.
