TEF Year Three: Additional data on part-time provision

Continuation

Paragraph 5.3 of the TEF specification states that "Students who continue studying at HE level at the same or at another provider, or who completed their qualification in the period considered, are deemed to have continued. All other students are deemed non-continuers. " The table below indicates continuation rates based on the above definition for Part-Time HE courses at Grantham college over recent years. HESA data on continuation rates of part-time entrants in the UK[1] is 63.2% for thosed aged under 30 and 66.8% for those over 30 so the college data compares favourably with these national averages for the majority of courses and overall.
