

Associations between characteristics of students

Annexes

Read in conjunction with OfS 2019.34

Enquiries to Annalise Ruck at official.statistics@officeforstudents.org.uk

Publication date 27 September 2019

Contents

Annex A: Definitions	3
Variable definitions	3
School types	5
Annex B: The continuation model	7
Annex C: The access model	15

These annexes should be read alongside the report 'Associations between characteristics of students' (OfS 2019.34), available at www.officeforstudents.org.uk/publications/associations-between-characteristics-of-students/.

Annex A: Definitions

Variable definitions

1. The variables used are all calculated from variables available on the national pupil database (NPD), the Education and Skills Funding Agency's (ESFA's) individualised learner record (ILR) or the Higher Education Statistics Authority's (HESA's) student record or alternative provider (AP) student record. Income Deprivation Affecting Children Index (IDACI)¹ and the Index of Multiple Deprivation (IMD) quintiles are obtain from the Office for National Statistics and are added to the NPD, ILR, HESA student and AP student records.

Age

2. Age, as used in the continuation model, is defined as the age of the student on the 31 August in the year in which they started their course. This is calculated using their birth date as reported on the ILR or HESA student or AP student records.

Disability

3. Disability information is only used from the ILR and HESA student and AP student records. Disability is self-reported by students at the point of starting their course.

Ethnicity

4. Ethnicity information is taken from the NPD for the access model and from the ILR and HESA student and AP student records for the continuation model. The data is collected differently across the three agencies and so a new grouping that covers the different levels of collection has been created. Table A1 below gives the details of the variables used and the codes included in each of the 18 ethnicity groups.

Table A1: ABCS ethnicity definitions

ABCS ethnic group	ILR code ²	HESA code ³	NPD code
Asian or Asian British – Bangladeshi	41	33	ABAN
Asian or Asian British – Chinese	42	34	CHNE
Asian or Asian British – Indian	39	31	AIND
Asian or Asian British – Pakistani	40	32	APKN
Asian or Asian British – Other	43	39	AOTH
Black or Black British – African	44	22	BAFT
Black or Black British – Caribbean	45	21	BCRB
Black or Black British – Other	46	29	BOTH
Mixed – white and Asian	37	43	MWAS
Mixed – White and black African	36	42	MWBA

¹ See <https://www.gov.uk/government/statistics/english-indices-of-deprivation-2015>

² See <https://www.gov.uk/government/publications/ilr-specification-validation-rules-and-appendices-2017-to-2018>

³ See <https://www.hesa.ac.uk/collection/c17051/a/ethnic>

ABCS ethnic group	ILR code ²	HESA code ³	NPD code
Mixed – White and black Caribbean	35	41	MWBC
Mixed – Other	38	49	MOTH
White – English/Welsh/Scottish/Northern Irish/British	31	12, 13, 10	WBRI
White – Irish	32	11	WIRI
White – Other	34	19	WOTH
Gypsy, Roma or Traveller	33	14, 15	WIRT, WROM
Other ethnic group	47, 98	50, 80	OOTH
Unknown or refused	99	98, 99	REFU, NOBT

IDACI

5. The Income Deprivation Affecting Children Index (IDACI) measures the proportion of children under the age of 16 in low income households for a particular area in England. It is calculated at lower-layer super output area (LSOA) level and is a supplementary measure to the Index of Multiple Deprivation (IMD), and therefore is designed and curated by the Office for National Statistics. In this analysis, we use IDACI quintiles, where the most deprived areas are in quintile 1 and the least deprived are in quintile 5. For pupils or students domiciled outside of England, the value is set to not applicable, and data is not presented in the interactive tools.

IMD

6. The Index of Multiple Deprivation (IMD) is a measure of levels of deprivation for a small area within England. It is calculated at lower-layer super output area (LSOA) level and uses a number of different measures to determine levels of deprivation. It is designed and curated by the Office for National Statistics⁴. In our analysis, we use IMD quintiles, where the most deprived areas are in quintile 1 and the least deprived are in quintile 5. For pupils or students domiciled outside of England, the value is set to not applicable, and data is not presented in the interactive tools.

Local or distance learner

7. Local or distance learner is defined by comparing home travel to work area with study travel to work area, which are calculated from home postcode and study postcode respectively. Full details can be found in the OfS core algorithms⁵ document under the variable B3MONLOCAL.

POLAR4

8. POLAR4 is a measure of the proportion of the young population that participates in higher education⁶. It only applies to students under the age of 21, and so POLAR4 is recorded as ‘mature’ for those aged 21 or over at the start of their course.

⁴ See <https://www.gov.uk/government/statistics/english-indices-of-deprivation-2015>

⁵ Available at www.officeforstudents.org.uk/data-and-analysis/access-and-participation-data-dashboard/guide-to-the-access-and-participation-data-resources/

⁶ For more details of the POLAR measure, see www.officeforstudents.org.uk/data-and-analysis/polar-participation-of-local-areas/

Sex

9. Sex is reported as either male or female. Very few records show a response of ‘other’ or are recorded as unknown. To avoid unnecessarily discarding data from the statistical model or having a group that is too small to use, responses other than male or female are grouped in with females (the larger of the two groups).

School types

10. School types are defined using the variable NFTYPE from the NPD. Our access model includes schools that we define as ‘maintained’ schools. Those from independent school are also considered, whilst schools of any other description are omitted altogether.
11. The school types, and whether they are included in the model (maintained schools), included in the wider analysis (independent schools) or not included can be found in Table A2.

Table A2: School types and level of inclusion in ABCS access model

Included in access analysis?	School type
Include in access model	Academy – Converter
	Academy – Sponsor-led
	City Technology College
	Community School
	Foundation School
	Free School – Mainstream
	Free School – Studio School
	Free School – UTC
	Voluntary Aided School
	Voluntary Controlled School
Included in wider analysis	Independent
	Independent School approved to take pupils with Special Educational Needs
	Independent Special School
	Non-Maintained Special School
Not included in this analysis	6th Form Centre/Consortium
	Academy – Converter AP
	Academy – Special School
	Academy – Sponsor Led AP
	Academy 16-19 Converter
	Academy 16-19 Sponsor Led
	Alternative Provision
	British Overseas School
	Community Hospital School
	Community Special School
	Converter Special Academy
	European Schools
	Federation
	Foundation Hospital School
	Foundation Special School

Included in access analysis?	School type
Not included in this analysis (cont.)	Free School – 16-19
	Free School – Alternative Provision
	Further Education Sector Institution
	Higher Education Institutions
	Institution funded by other Government department
	International School
	LA Nursery School
	Legacy types/Miscellaneous
	Offshore Schools
	Other Independent Special School
	Overseas Schools/Service Children's Education
	Playing for Success Centres
	Pupil Referral Unit
	Secure Unit
	Special Colleges
	Special Free School
	Welsh Establishment

Annex B: The continuation model

12. Table B1 shows all the factors included in the continuation model, and the level within each of those factors.

Table B1: Factors included in the continuation model

Variable	Categories
Age	18 and under 19 20 21-25 26-50 50+
Disability	Cognitive or learning difficulties Mental health condition Multiple impairments Sensory, medical or physical impairments Social or communication impairments No known disability
Ethnicity	Asian or Asian British - Bangladeshi Asian or Asian British - Chinese Asian or Asian British – Indian Asian or Asian British - Pakistani Asian or Asian British - Other Black or Black British - African Black or Black British - Caribbean Black or Black British – Other Mixed – white and Asian Mixed – White and black African Mixed – White and black Caribbean Mixed – Other White – English/Welsh/Scottish/Northern Irish/British White – Irish White – Other Gypsy, Roma or Traveller Other ethnic group Unknown or refused
Income deprivation affecting children index (IDACI)	Quintile 1 (most deprived) Quintile 2 Quintile 3 Quintile 4 Quintile 5 (least deprived) Not English domiciled
Index of multiple deprivation (IMD)	Quintile 1 (most deprived) Quintile 2 Quintile 3 Quintile 4 Quintile 5 (least deprived) Not English domiciled
Local or distance learner marker	Local or distance learner Not local or distance learner

Variable	Categories
POLAR4	Quintile 1 (least represented)
	Quintile 2
	Quintile 3
	Quintile 4
	Quintile 5 (most represented)
Sex	Mature
	Female
	Male

13. The continuation model used data on 1,938,565 full-time undergraduate students who were UK domiciled at the start of their course and studying at a provider in England. Of those, 1,756,975 continued into the second year of their full-time undergraduate studies and 181,590 did not. The coefficient estimates for each of the factors and for all the two-way interactions included in the final model are in Table B2.

Table B2: Coefficient estimates of the factors and interactions included in the continuation model

Annex C: The access model

14. Table C1 shows all the factors included in the continuation model, and the level within each of those factors.

Table C1: Factors included in the continuation model

Factor	Level
Ethnicity	Asian or Asian British – Bangladeshi
	Asian or Asian British – Chinese
	Asian or Asian British – Indian
	Asian or Asian British – Pakistani
	Asian or Asian British – Other
	Black or Black British – African
	Black or Black British – Caribbean
	Black or Black British – Other
	Mixed – white and Asian
	Mixed – White and black African
	Mixed – White and black Caribbean
	Mixed – Other
	White – English/Welsh/Scottish/Northern Irish/British
	White – Irish
	White – Other
	Gypsy, Roma or Traveller
	Other ethnic group
	Unknown or refused
Free school meals marker	Received free school meals
	Did not receive free school meals
Income deprivation affecting children index (IDACI)	Quintile 1 (most deprived)
	Quintile 2
	Quintile 3
	Quintile 4
	Quintile 5 (least deprived)
	Not English domiciled
Index of multiple deprivation (IMD)	Quintile 1 (most deprived)
	Quintile 2
	Quintile 3
	Quintile 4
	Quintile 5 (least deprived)
	Not English domiciled
POLAR4	Quintile 1 (least represented)
	Quintile 2
	Quintile 3
	Quintile 4
	Quintile 5 (most represented)
	Mature
Sex	Female
	Male

15. The access model used data on 2,761,960 pupils from maintained schools. Of those, 1,112,900 accessed higher education aged 18 or 19 and 1,649,060 did not. The coefficient estimates for each of the factors and for all the two-way interactions included in the final model are in Table C2.

Table C2: Coefficient estimates of the factors and interactions included in the continuation model
